Subject: **Installation and Registration**

NSol! now requires activation for each machine on which it is installed. Each license is good for installation on two computers. The purchase / registration / activation process is as follows:

- ❖ Download the software.
- ❖ Send an email to nsolpv@verizon.net and we will send information on how to pay for the software via PayPal. (Note – this is the only payment which we presently accept.)
- ❖ Once you have paid, we will email a serial number for each product.
- ❖ Install the program using the files supplied.
- ❖ Once you start the program for the first time, you will see the following screen:

- ❖ Click on the lower button [**Register (Apply for Code)**], which will bring up the registration screen:

- ❖ Fill this out, using the serial number supplied, and click on [**Send**]. This will open your email program to send the email to us.
- ❖ We will generate a unique activation code and send it back to you, typically within a couple of hours.

- ❖ Now click on the **[Enter Activation Code]** Button, which will bring up the following screen:

- ❖ Type in the exact serial number and exact Activation Code and click [Activate] and you are ready to go.
- ❖ Repeat the process for a second computer if desired.
- ❖ This procedure stores your activation information in a file called “nsol_egistration.dat” or “nsolgt_registration.dat” which is stored in the same directory as the program. This file must remain where they are installed in order for the program to work properly.
- ❖ Each computer has a unique “machine identifier” which tells the program that it is allowed to run. In the event that you upgrade to a new operating system or a new computer, the activation process will need to be done again.
